Problem Statement

Java

Given an Array A of N numbers, Write a program to print the number of odd numbers.

Constraints :

$$1 <= N <= 10^6$$

$$1 <= Ai <= 10^6$$

$$0 <= i <= (N-1)$$

Input Format :

First line contains N numbers separated by comma

Output Format :

Count of odd numbers

Sample Input :

16,3,8,2,1

Sample Output :

2
